RE: Travis Bush, Superintendent

I am writing to express my satisfaction, appreciation, and gratitude for the experience I had in working with Travis on our jail project. He and his crew did an outstanding job in the quality and efficiency of their work. I know our new jail was a comparatively small project but still there were a number of new challenges that Travis had to deal with. Even our architect stated this was the "biggest little project" he had been involved in. What also impressed me with Travis was that he was not only very professional but he was also very personable to deal with throughout the project. After completing his project here, he made a point to stop and visit me, asking if there were any other issues or concerns that he could take care of before leaving. I know our construction manager and buildings and grounds person enjoyed working with Travis as well.

I also might add that I am very impressed with the quality of the cell units, day rooms, and sally ports that your company provided. Hopefully they will provide many years of safety and security for our facility.

Sincerely,

Sheriff Donald J. Montonye
